CCK Plugin

EDTECH

Smart Goals Center

An integrated WordPress and Moodle learning platform for the Smart Goals Center, providing a seamless educational experience for students and trainers.

WordPress · Moodle · PHP · MySQL

EDTECH

EduSwarm

An integrated Moodle and WordPress learning ecosystem with custom Node.js services, designed for large-scale educational deployments.

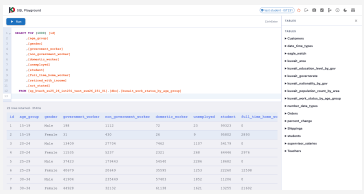

Moodle · WordPress · Node.js · MySQL

EDTECH

Quizzer

A cross-platform quiz and assessment platform built with Firebase, MERN stack, and Flutter enabling educators to create and deploy live and engaging quizzes for their students.

Firebase · MongoDB · Express.js · React

EDTECH

SQL Playground

An interactive browser-based SQL learning environment for students and instructors.

React · Node.js · Express.js · Microsoft SQL Server 2025

CLOUD

Lably

A cloud-based virtual lab platform powered by Google Cloud and Kasm, delivering browser-accessible Linux environments for students.

Google Cloud · Docker · Kasm · Linux

WEB APPLICATION

Kuwait Developers

A developer community platform for Kuwait Developers, combining a Next.js frontend with Discourse forums to foster knowledge sharing and networking.

Discourse · Next.js · React · Node.js

WEB APPLICATION

The KNRC

A full-stack MERN website for The Kuwait National Robotics Competition (KNRC), managing registrations, event info, and competition results.

MongoDB · Express.js · React · Node.js

WEB APPLICATION

SpeechHub

A WordPress and Node.js-powered platform for SpeechHub, enabling speech therapy professionals to manage clients, sessions, and resources online.

WordPress · Node.js · PHP · MySQL

02

Real Estate

3 clients · 5 projects

WEB APPLICATION

GulfProp — عقارات الخليج

A real estate marketplace for Kuwait — buy, rent, and discover properties across all regions.

Node.js · Express.js · MongoDB · Google Maps

WEB APPLICATION · MOBILE APP

Sakan

Sakan — Website
Sakan — CMS
Sakan — Mobile App

WEB APPLICATION

Bawabah Website

A full-stack web application that serves as property management portal.

MongoDB · Express.js · React · Node.js

03

Logistics & Retail

3 clients · 3 projects

LOGISTICS

Wasal

Kuwait's same-day delivery platform connecting consumers, merchants, and businesses across all governorates.

Node.js · Express.js · MongoDB · Flutter

E-COMMERCE

Nazzak — E-Commerce

A WordPress and WooCommerce e-commerce solution for Nazzak, delivering a polished online shopping experience with seamless payment integration.

WordPress · WooCommerce · PHP

A digital experience for Bliss Mallathon, a free walking and running challenge at Assima Mall in Kuwait City.

Strava · Event Registration · Live Leaderboard · Responsive Web

04

Government & Civic

1 client · 1 project

WEB APPLICATION

Sada — Elections System

A secure digital elections platform for Sada, built with a Node.js GraphQL backend and Gatsby frontend deployed on Vercel for speed and reliability.

Node.js · GraphQL · Gatsby · Vercel

05

IoT, Robotics & Security

5 clients · 5 projects

C

IOT

Car Parking Tracker

An IoT-powered car parking tracking system using microcontrollers and sensors to monitor parking bay availability in real time.

IoT · Microcontroller · C++ · Arduino

R

IOT

Raskala

An IoT project built on microcontroller hardware, designed to automate and monitor physical environment conditions with precision.

IoT · Microcontroller · C++

P

IOT

Plant Monitor

A Raspberry Pi-based plant monitoring system using IoT sensors to measure soil moisture, temperature, and light, with automated alerts.

Raspberry Pi · IoT · Python · Sensors

k

ROBOTICS & AI

kbot

An AI-powered robotics project combining computer vision and intelligent automation to create an interactive autonomous robot.

Robotics · AI · Python · Computer Vision

CYBERSECURITY

Cyber Breach

A cybersecurity challenge platform featuring a terminal-style decryptor game with 389+ randomised questions across layered breaches.

Node.js · Express.js · MongoDB · Game

Let's build what's next.
